

# Children's Corner Day Nursery

## Toilet Training Procedure

At Children's Corner day Nursery we work in partnership with parents to make toilet training as stress free as possible for both parents and children.

1. Discuss your child's individual needs with their key worker
  - a. Identify whether the child is ready to commence toilet training
  - b. If the child is ready agreed by both parties, then agree Nursery's process to support this transaction
  - c. If parent agrees that the child is ready and the Nursery staff does not this needs to be expressed but a mutual agreement needs to be achieved
2. Please provide your child with several sets of spare clothes, including socks
3. If your child sleeps during the nursery day please continue to provide nappies or pull ups until they are no longer required
4. If you need to put a nappy on your child to travel to and from nursery can you please ensure you place underpants over the top of the nappy and inform a member of staff that they have a nappy on. This way causes less distress for the child especially in the early stages of toilet training.
5. Please remember to check your child's box on a daily basis, as soiled clothes will need to taken daily
